**Subject:** Your proposed settlement is horrible.

Your proposed settlement gives Microsoft the privilege of being above the law. You should realize that you are suing Microsoft not Microsoft suing the federal government! Microsoft must at the very least be broken up into three different companies for there to be any chance of keeping a choice in the computer industry.

Already I am practically forced by Microsoft's monopoly to use their internet service, their cable TV service, their operating system, their applications, and their web browser.
